

# A<sup>4</sup> Systems Corporation

## Overview

A<sup>4</sup> Systems Corporation was founded in 2015 with a vision to dominate all technologies required to execute Advanced Service Delivery globally. Over the years, A4S has developed multiple Industrial IoT (IIoT) devices and SaaS platforms to support data driven decisions for resource extraction and petroleum contracting companies.

## Product Offering

**Founded:** 2015

**Business Stage:** Growth

**Business Model:** Upfront capital costs for IIoT devices and recurring monthly revenue from SaaS subscription.

### Team:

CEO – Adam Morand

CFO – Lee Krause

CMO – Marcus Cormier

COO – George Ross

CTO – Darrell Remillard

# A<sup>4</sup> Systems Corporation

## Problem

The current digital transformation facing the world is disrupting the operational strategies of all companies, creating a need for them to adopt IIoT and SaaS technologies in order to remain competitive. Many companies are still behind in the adoption of fully integrated IIoT and SaaS solutions, posing a threat to their sustainability.
